# Smoothening the transition to Primary 1

1. Transition is the process in which a child moves into a new environment

2. When moving from pre-school to primary, a child will have to adapt to unfamiliar setting and routines

When your child has transited well, he/she will:

- Feel safe and comfortable in the new environment
- Be able to manage daily challenges
- Be able reach out to teachers and/or peers for support when needed

ANCHOR GREEN PRIMAR.

# Some questions you may have...

Practise with your child when and how to ask for help. Remember to affirm them for their efforts.

Asking for help may not seem obvious to a child.

**Teach your child how to ask for help:**

**Step 1:** Look for someone who can help

**Step 2:** Check if that person has the time to help; if not, look for another suitable person

**Step 3:** Share what the problem is and how they feel

**Step 4:** Listen carefully to the advice given

**Step 5:** Thank the person for the help

# Some questions you may have...

**Remind your child that eating during recess is important as it helps them with the physical energy to continue focusing and learning in class.**

Students may enjoy recess so much that they forget to eat. Some students may not be eating because they are shy about ordering food.

## Encourage your child to eat during recess

- Let your child practise ordering food and making payment when out with the family
- If they need more time to build their confidence or observe how it is done by other students, you may pack a lunch box in the meantime, so they will always have something to eat
- If you worry that your child is not eating at all, discuss with your child's teacher
