# **PREPARING YOUR CHILD FOR PRIMARY 1**

Preparing your child for Primary 1 can be an exciting journey. Parents can play a critical role in helping your child prepare for this transition. Doing things like teaching your child life skills and familiarising your child to the new routine can support their transition with ease.

Some of the challenges faced by students entering primary school may include:

- Adapting to a new school environment with a larger class size.
- Making new friends
- Having to cope with longer school hours and new routines
- Learning to be more independent and adjust to a new phase of life

It takes time for children to get used to a new environment. As parents, it is important to provide space for our children so as to allow them to get used to the changes. Parents should also encourage your child and celebrate each milestone as they overcome challenges. Reassure your child that changes are normal. You can be a role model by being adaptable and flexible so that your child's anxieties or worries can be eased too.

## **Building Strong Foundations: Knowledge, Skills & Dispositions (KSDs) at the Start of P1**

- The lower primary curriculum nurtures students' joy of learning, builds on pre-school foundations, and promotes dispositions and attitudes for lifelong learning.
- The following are professionally determined expectations on what most children should be equipped with at the start of P1. Our teachers will continue to build on these to strengthen our students' foundations and nurture active, curious learners.
